Taylor's Nursery can beautify your home with Shrubs

◆ ◆ ◆ PRICE LIST, 1939 ◆ ◆ ◆

SPECIAL NOTICE

All named varieties of fruit trees sent out will have attached to each tree a zinc label with name marked in weather-proof ink. We are the only Nursery in the West that are giving their customers this added service.

STANDARD LARGE APPLES

ANISETTE—Similar to Duchess, but hardier.

BATTLEFORD—A Russian seedling found fruiting in the Battleford district by Mr. W. J. Boughen, a medium sized apple of excellent quality and very hardy. Trees grown at our Nursery for the past two years have shown no winter injury. (Sold out Spring, 1939)

BLUSH CALVILLE—Extremely hardy, fruit medium to large, conical, yellow with slight blush, quality good.

HEYER 12—A yellow Harvest apple, originated in Saskatchewan, and hardy all over the prairie. Will fruit at three years, is good to eat, and makes grand apple sauce and pies. We recommend this tree to every one who wants to grow apples.

MOSCOW PEAR—A Russian apple, good size, very hardy, resembles the Greening. Good to eat or cook, and ripens in September. (Sold out Spring 1939)

PINE GROVE RED—A Duchess seedling, bearing medium-sized, dark red fruit of good quality. One of the hardiest. (Sold out Spring 1939)

PIOTET—In northern Saskatchewan this has proved the hardiest apple grown. Small, but very prolific, good color and flavor.

PRINTOSH—Of all the apple trees we set out in 1935, our Printosh bore the heaviest load last summer. Ripens late September, and very nice to eat. (Sold out Spring 1939)

ROSILDA—A good quality red apple, measuring two inches and over. Strong growing tree, and the fruit is one of the best for canning. (Sold out Spring 1939)

SWEET RUSSET—A small yellow apple about 2 inches in size, excellent eating, resembling more the Tolman Sweet than the Russet of Eastern Canada. Very hardy, fruitful, and starts to bear from fourth year. (Sold out Spring 1939)

TRAIL—A nearly two-inch apple-crab, but so good to eat you will call it an apple. The most popular of the Saunderson's "Second Cross" seedlings, with Wealthy blood in it, which shows up in the beautiful red-striped fruit. Trees set out in our orchard in 1935 have so far shown no winter injury.

1 year old	1.00 each; 12 for	10.00
2 year old (where available)	1.50 each; 12 for	15.00

CRAB APPLES

ADAM—A large red crab. Commences to fruit at three years old. A good bearer. Very hardy.

AMUR—Our hardiest red crab, bearing tremendous loads of flattish fruit, reddish inside as well as out, so that it makes the reddest jelly of all. A strong upright grower, making a handsome tree.

FLORENCE—A prolific bearer of large, highly colored crabs, excellent for jelly, and particularly good for canning, as the skin practically melts away.

DAUPHIN—The earliest crab we have ever seen, as trees often commence to bear at two years old. The fruit is small, really a baby Yellow Transparent, good to eat, and grand to can, but the kiddies will clean off the tree before you get a chance to can any. Absolutely hardy, and prolific.

DOLGO—A beautiful ornamental, as well as a superb jelly crab. Brilliant scarlet conical fruit, ripening August to September.

GARNET—Red jelly crab, later than Amur. Limited quantity this year.

MECCA—Large hardy crab.

OSMAN—Considered the most satisfactory crab at present being grown on the prairies. Very hardy, a heavy cropper, good size and exceptionally good for canning and when fully ripe is regarded as good eating for a crab apple. Color is reddish turning deeper when quite ripe.

TRANSCENDENT—One of the old commercial varieties. Golden yellow fruit streaked with red. Hardy and good cropper.

1 year old	1.00 each; 12 for	10.00
2 year old (where available)	1.50 each; 12 for	15.00

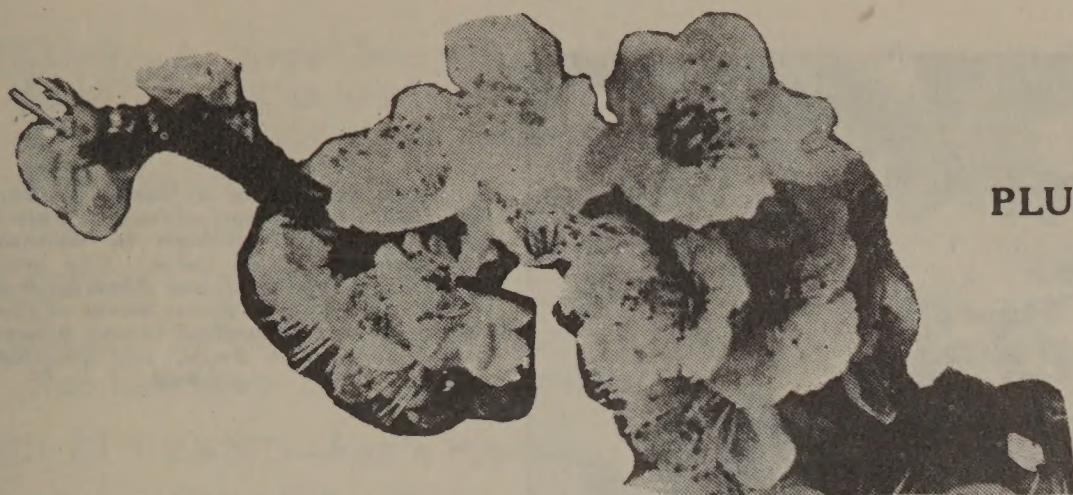

ORNAMENTALS—Rosy-bloom crabs. Hardiest of Macoun's introductions. Pink or red blooms, red fruit. Nipissing, Erie, and Wabiskaw.

1.00

PYRUS TRANSITORIA—Hawthorn-leaved crab, native of Manchuria, makes beautiful ornamental.

1.00

SEEDLING CRABS—Make splendid windbreak planted 6 or 8 feet apart, they blossom at 5 to 6 years old, good to pollinate your orchard, fruit grand for jelly or to jelly chokecherries or sandcherries. Year old, \$1.00 per dozen; 3 years old, 5 for \$1.00. Larger selected trees up to 50c each.

PLUMS

ASSINIBOINE—A selected Manitoba native plum, and considered one of the best being grown in the West. Fruit is large, $1\frac{1}{2}$ by $1\frac{3}{4}$, bright red in color with flesh of excellent flavor and a fairly thin skin. The fruit is good for all cooking purposes and an excellent canner.

C.K.C. PLUM (S. Wheeler)—Assiniboine seedling, with thin skin, good size and quality, and very hardy. (Sold out Spring 1939)

McROBERT—An Assiniboine seedling of good quality, redfruit, early ripening. Ripens a few days earlier than its parent. (Sold out Spring 1939)

MINA—A Pembina seedling about the size of Assiniboine, more hardy and fruitful than Pembina, excellent canner.

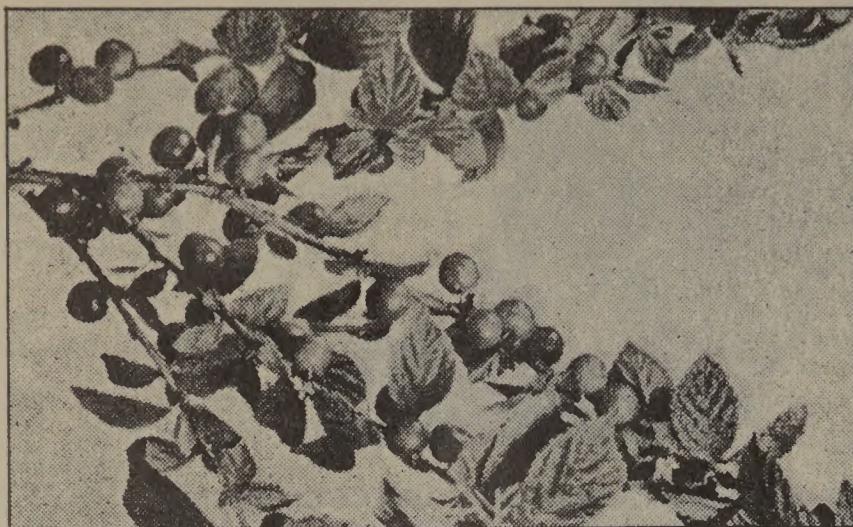

MORDEL—Seedling of Assiniboine plum, tree, strong, upright with spreading top branches, fruit to $1\frac{1}{2}$ inches long, dull red surfaced with light bloom, ripe in late August. Quality is fair out of hand but distinctive canned, carrying a raspberry flavor.

OLSON—Bright red fruit, smaller than Assiniboine but very hardy. Good quality for canning. (Sold out Spring 1939)

SCOTT—A red plum of very fine quality, originated at the Scott Experimental Station. Very hardy. (Sold out Spring 1939)

VALLEY RIVER—Another Manitoba native plum selected by W. J. Boughen. A red plum of good quality. (Sold out Spring 1939) 1 year old. 1.00 each; 12 for 10.00
2 year old (where available) 12 for 15.00

SPECIAL BARGAIN COLLECTION FRUIT TREES. Owing to the difficulty of foreseeing the quantity of trees of each variety necessary to fill the demand, we generally have a surplus of good varieties as well as a quantity of newer varieties of which the stock is too small to list in our Catalogue. Some of these are very good, and will be listed just as soon as sufficient quantity is propagated. These are all named varieties, true to name, all marked with our weatherproof labels. Our selection of trees, apples, crabs and plums included if available 9 for 5.00

A small branch of a Nanking cherry bush carrying a heavy load of fruit. This fruit is a little over half-an-inch in diameter, and brilliant scarlet in color. The ornamental effect of the round red cherries among the thick, hairy, light green leaves of the bush is very striking. The fruit is very acceptable for eating from the bush, and excellent when cooked.

CHERRIES AND CHERRY PLUMS

NANKING CHERRY—One of the most beautiful members of the Cherry family, pale pink flowers. In addition the bright red cherries are of fair size and very good flavor. 3 feet. Each	1.00
CHAMPA—Is an upright growing bush. Dark skinned, green fleshed fruit, smaller than Sapa or Opata but hardier. Good for cooking and for eating out of the hand; and hangs on bushes well.	
OPATA—One of the best known varieties on the prairies. Fruit somewhat larger than Sapa with a deep purplish skin and green flesh. Very sweet and good for eating out of the hand and excellent for cooking.	
TOM THUMB—Somewhat smaller than Sapa but a very heavy cropper. Excellent for cooking and fair for eating out of hand.	
1 year old	1.00 each; 12 for 10.00
2 year old when available	1.50 each; 12 for 15.00
BROOKS (Sandcherry)—An improved form originated at Brooks, Alta. Fruit up to 1 inch in diameter, excellent quality.	1.00
MANMOOR (Sandcherry)—A vigorous upright bush bearing $\frac{3}{4}$ inch fruits, round, meaty, mild in flavor and of first quality canned. Ripens in August. (Sold out Spring 1939)	1.00
SIBERIAN CRAB SEEDLINGS—1 year old	—12 for 1.00
Per hundred	6.00
3 years old, each20
MANITOBA NATIVE PLUM—4 years old 50c each; 2 years old 35c each; 3 for 1.00.	

SMALL FRUITS

RASPBERRIES—

CHIEF—Very hardy and a heavy bearer. Not quite as large as Herbert but more fruit.	
Per hundred	7.00
Heavy selected canes	12.00
HERBERT—This variety has been a heavy and regular bearer with us for a number of years. We consider it very suitable for this district.	
Per hundred	6.00
Heavy selected canes	8.00

VIKING—A large berry and easy to pick. Firm, and easily handled. Not as hardy as other varieties but if covered is worth growing for its large fruit.

Per hundred	7.00
Heavy selected canes	12.00

LATHAM—Similar to Chief but later. Per hundred

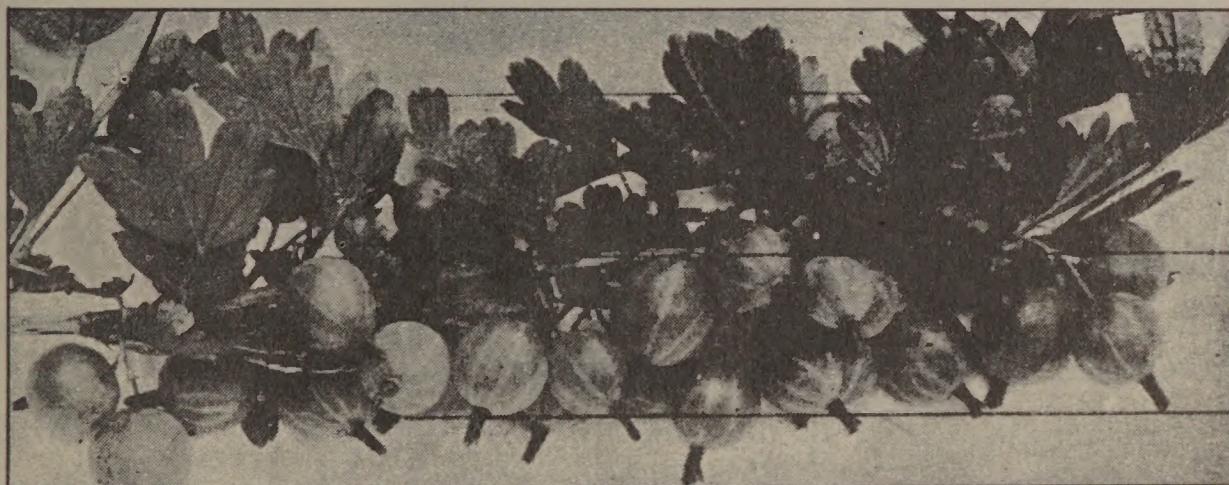

Heavy selected canes	6.00
Not less than 25 at these prices.	8.00

Large bushes, **50c** and up; 1 year old, 12 for 1.00

CONIFERS

JUNIPERUS HORIZONTALIS—Prostrate Juniper. A fine evergreen for rock garden planting. Has Cedar-like foliage and is flat on the ground. 12 to 18 inches spread. Each

.75

JUNIPERUS SABINA—Hardy, more upright growing form, 8 inches. Each

.75

JUNIPERUS SABINA TAMARISCIFOLIA—This beautiful evergreen is suitable for rock gardens owing to its spreading habit. Perfectly hardy and one of the best low growing evergreens we have. 8 inches. Each

1.00

JUNIPERUS SCOPULORUM—Native of the Rockies, bluish color, good shape and fairly fast grower, 8 to 12 inches. Each

.75

PICEA CANADENSIS—White Spruce—This is the native spruce growing all through the northern part of the continent. These trees are grown from seed at the Nursery and have all been twice transplanted.

6 to 8 inches. Each25

2½ to 3 feet. Each 1.25

4 feet. Each 2.00

PICEA CANADENSIS ALBERTIANA—Black Hills Spruce—A very compact form, keeping its round sturdy habit at all times. The most compact growing of the Spruce family. 2 to 3 feet. Per foot

.75

PICEA PUNGENS GLAUCA—Colorado Blue Spruce—When grown from seed only a small percentage of the trees come blue. These are well shaped trees, branched right to the ground.

Picea pungens glauca
(Colorado Blue Spruce)

.75

4 feet, each

1.00

HYDRANGEA ARBORESCENS GRANDIFLORA—Large globular white flowers. Quite hardy and free flowering. Early August. Each

1.00

LILAC-GRAFTED

LILACS—The best-loved of

all flowering shrubs. You should grow some of the new hybrids, just as fragrant as the old-fashioned kind with bigger flowers, and brighter colors, many of them double.

Katherine Havemeyer

Chas. Joly—Dark purple-red. Double. 1.50

Congo—A deep purple variety with large bloom. Single. 1.50

Glory of Hortenstein—A new variety with blooms measuring about 12 to 15 inches in length and 24 inches in circumference. Color is deep rd when opening, turning to soft lilac. 1.50

Jan Van Tol—Enormous trusses of purest white, splendid lilac of great merit. 1.50

Katherine Havermeyer—Cobalt-lilac flushed mauve, enormous flowers. Double. Received Award Merit in England. New. 4 years old. Each 2.50

Leon Gambetta—Rosy-mauve, buds quite pink, trusses to 14 inches. Double. New 2 years old. Each 1.50
4 years old. Each 2.50

Marceau—Claret purple, grand panicles, broad flowers. Single. New. 2 years old. Each 1.50
4 years old. Each 2.50

Miss Ellen Willmott—Purest snow-white, flowers of perfect shape, grand elegant trusses, the finest white. New. Double. 2 years old. Each 1.50
4 years old. Each 2.50

Mary le Graye—Pure white. Single. 1.50

Souvenir de la Spath—A fine lilac, blackish-red bloom. Single. 1.50

LILAC IN VARIETIES—

JAPONICA (Japanese tree lilac)—Strong growing variety which will attain a height of 20 feet. Heavy foliage. 3 ft. 1.00
4 feet 1.50

JOSIKEA (Hungarian Lilac)—Deep purple buds arranged in panicles and opening to light violet colored flowers. 4 to 5 feet, each 1.00

VILLOSA—Rosy-pink. One of the hardiest of the lilacs. Large foliage. 4 to 5 feet. Each	1.00
PHILADELPHUS (Lewisii "Waterton")—A form of Mockorange, hardy in the West. Each	.75
POTENTILLA (Fruticosa)—Blooms all summer with clear yellow flowers. Each	.75
PURPLE LEAF SAND CHERRY (Cistena)—This very desirable shrub has reddish purple foliage all the year. Very showy, each	1.00
SEA BUCKTHORN—A strong growing shrub with greyish white foliage, large thorns, and bears orange-yellow berries in the fall. Useful for planting with other shrubs because of its contrast in foliage.	1.00
SIBERIAN ALMOND—This shrub bears large quantities of pink blossoms early in the spring and is extremely hardy. Large bushes	.75
	1.00

TAYLOR'S NURSERY
CAN BEAUTIFY
YOUR HOME
WITH SHRUBS

SPIREA—

Flexuosa—A hardy species from Korea. Flowers like Hawthorn only smaller. Earlier than Van Houttei.

Sorbifolia—A very distinct form with long compound leaves and large compact terminal clusters of small white flowers.

Media—The silky leaved Spirea is very much like S. Van Houttei but quite hardy, grows about 3 feet high.

Pickoviensis—Upright growth to about 4 feet. Somewhat like Van Houttei only bloom not such a pure white. Perfectly hardy.

Frobelli—Bright rosy red. Compact bush growing from 2 to 3 feet. Foliage turns purple in fall.

Trichocarpa—A fine new shrub, growing 4 to 6 feet tall, forming a dome-shaped bush, covered with large clusters of magnificent white flowers, distinctly "eyed" in the centre. Very hardy and blooms later than S. Van Houttei. All Spireas, each .75
Large bushes. Each 1.00

TAMARIX (Hispida aestivalis)—A very graceful shrub with feathery foliage of pale green and bearing large plumes of pink blossoms in late summer. Each 75c and 1.00

HARDY ROSES

ALTAICA—A shrub to 4 feet high with small neat foliage and large cream white flowers. A free flowering and handsome rose. Hardy, strong bushes.75

BELLE POITEVINE—Very double magenta pink, sweetly fragrant flowers of true rugosa type. Each .75

BETTY BLAND—A hybrid of Rosa Blanda which grows to 6 feet high. It is covered with double pink roses during June. Strong bushes, 2 to 3 feet.75

BURNETT—A very fragrant double cream variety of Rosa Spin-ossissima, blooms in June. Strong bushes.75

HANSA—A semi-double Red Rugosa. Very hardy and free blooming.75

PERSIAN YELLOW—Semi-double free flowering. One of the oldest roses grown and standard in the West. Very hardy.75

PERENNIAL CLIMBERS

AMPELOPSIS ENGELMANNI (Virginia Creeper)—Improved Virginia Creeper, which clings to walls and needs no support. Each

.50

AMPELOPSIS (QUINQUEFOLIA) VIRGINIA CREEPER—This well-known creeper is one of the best and quickest growing varieties grown. Leaves turn brilliant shades of yellow and crimson in the fall. Each

.50

CELASTRUS SCANDENS (Bitter Sweet)—A native vine growing to a height of ten to fifteen feet. The orange fruit which opens and shows scarlet seeds are extremely showy.

Each, 35c, 3 for

1.00

CLEMATIS—

Tangutica—A perfectly hardy climber bearing yellow four petalled flowers about two inches across. These develop into very pretty white fuzzy seed pods. Each

.50

Ligusticifolia—A hardy native Virgin's Bower with beautiful glossy leaves, and panicles of white flowers. Tall grower

.50

DAHLIAS

DAHLIAS—CACTUS

DARLING—Soft salmon slightly mauve tinted. A most graceful cactus on long wiry stems. Each

.50

ELITE GLORY—Monster flowers of bright radiant red

.50

FRAU O. BRACHT—Primrose yellow. The immense flowers are carried on long stiff stems. Each

.50

LEMONIA—A large pure Cactus with semi-incurving florets, lemon yellow. Good stems and excellent habits.

.75

MISS BELGIUM—Color pure orange, medium size, long stems, free flowering.

.50

MISS CANADA—A very large bright scarlet cactus. Good stems

.50

NEW GLORY—Deep blood-red, regularly white tipped petals. Good stems.

.50

NORTHLIGHT—Deep rose. Good strong stem, and excellent cut flower.

.25

RED ABUNDANCE—This beautiful variety of the Frau O'Bracht type, is coral-red. Free flowering, good stems.	.40
REICHARDT'S MASTERPIECE—Canary yellow, a third part of florets are clear amethyst. Good stems.	.75
WELCOME—A seedling of Frau O'Bracht but deeper yellow and larger in size. A dahlia of nearly perfect form.	.75

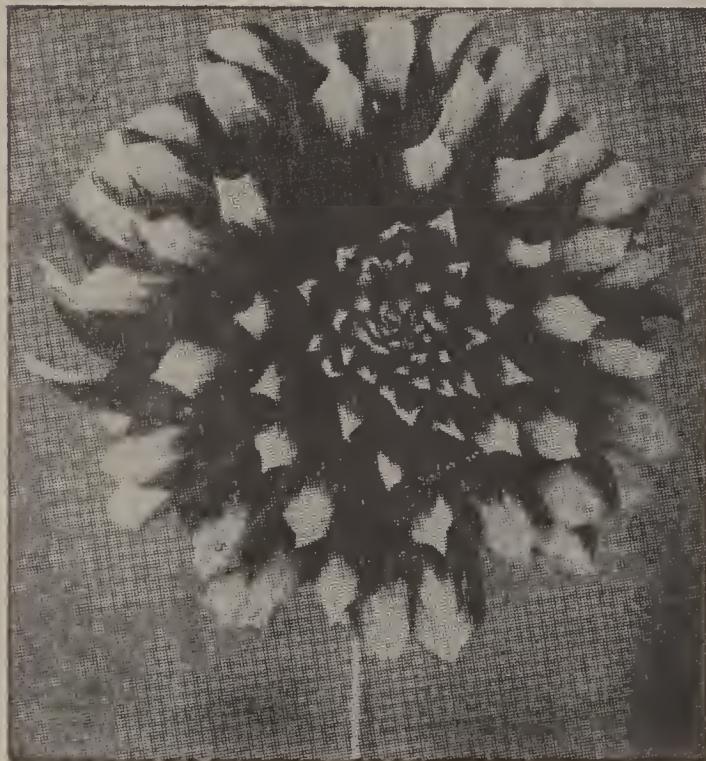

DAHLIAS-HYBRID CACTUS

ANDRE CSIZIK—A flower of 6 inches in diameter, and of extreme beauty. Color bright pinkish mauve. Long stems.	1.00
ELLA BRUIDEGOM—Deep cerise rose, well formed blooms on long wiry stems, free flowering.	.50
JOLLY BOY—Salmon-red with amethyst. The fine pointed florets and center golden flushed. Improvement on Andreas Hofer	.75
SATAN—Bright red with slight orange markings, enormous flowers.	.75

DAHLIAS—DECORATIVE

ALBERTA PURPLE—Aster purple, centre dahlia purple. Free flowering and of good habit, strong stems, and flowers of good size. Each	.25
BALLEGO'S GLORY—Rich maroon, golden edged petals.	.75
BAUERS IDEAL—Brilliant scarlet-red with velvet glow. Large, well-formed bloom, good stem and prolific bloomer.	.75
BOB BARKER—Large pink with gold tips. Similar to Jersey's Beauty in form and growth.	.50
CHAS. L. MASTICK—The color is rich, bright orange, deeper at centre. Large blooms on strong stems.	.50
CHAS. G. REED—Improved Robt. Treat. Bright cherry red, large good stem and habit.	.50
DAILY MAIL—Golden yellow with bronzy centre. Large, highest awards wherever shown.	.50
ELLINOR VANDERVERE—A magnificent rose pink, long stems and held well erect.	.30
ENTRUPS MONARCH—Cherry red on white ground. Gigantic flower on long stem.	1.00
EAGLE ROCK FANTASY—Mallow pink exquisitely beautiful. Enormous size, long stems, free flowering.	.50
GOLDEN EMBLEM—A clear golden yellow without shading or trace of any other color. Huge flowers, 9-10 inches across. Stems are all that could be desired, long and wiry. Good keeper	.40
GOUV. BAEELS—A unique bi-color. The underground is yellow, tips of florets red. A greatly improved Champoeg.	.50
GRACE CURLING—Color is pure white at base and to half the petals, then changing to lilac-pink and rose. Huge broad florets, bluntly tapering and tastefully notched at tips.	.50

GRADA—A pure pink sport of Jersey's Beauty, same size of flower and grand habit plant.	.50
HORTULANUS WITTE—Pure white, good stems. One of the old Dutch varieties but still hard to beat.	.25
JERSEY'S BEACON—Chinese scarlet with paler reverse, giving a two-toned effect, a very large flower with good stem.	.35
JERSEY'S MASTERPIECE—A fine exhibition variety with long stiff stems. In color it is a strawberry-pink, suffused old gold at the base of florets.	.40
JERSEY'S SOVEREIGN—A new shade and as near as we can describe it is a salmon-orange throughout. A vigorous grower with flowers of large size and on good stems.	.35
KATHLEEN NORRIS—Color a true rose pink, later deepening to mallow pink, but paler in the young central petals. A bloom of gigantic proportions, petals broad and overlapping, with twisted ends. Strong stems and good foliage. An excellent keeper and a prize winner wherever shown.	.50

MAKE YOUR
HOME BEAUTIFUL
WITH SHRUBS

KING ALBERT—Deep maroon with white tips to each petal. A very beautiful flower on good stem.	1.00
LADY MOYRA PONSOMBY—The huge flowers are citron-yellow. Excellent stems.	1.00
LORD OF AUTUMN—The flower is golden yellow, very large and deep, long pointed and twisted petals. Good stems.	1.00
MRS. ELEANOR MARTIN—Immense size on stiff stems. Color a beautiful mulberry suffused with gold.	.30
MRS. I. DE VER WARNER—Large perfect flowers of charming color. A deep mauve-pink, on stout stems. A good grower and free bloomer. This is extra good and can be grown 9 to 10 inches across.	.30
MRS. G. Le BOUTILLIER—Brilliant deep carmine-red. The enormous flowers can be grown to 14 inches in diameter.	1.00

MODERN TIMES—A splendid bi-color, orange, scarlet and white. Flowers are about 8 inches in diameter carried on long sturdy stems. Good habit.	5.00
MUNCHHAUSEN—The large regular flowers are salmon-red, points of florets pure white.	.50
OMAR KHAYYAM—Large formal blooms are Chinese Red at base of petals, shading to bright orange and tipped lighter. Good stems and habit.	.50
REMARKABLE—The color is fiery red, the petals regular white tipped. Good flowers on strong stems.	.50
ROSE FALLON—A beautiful deep old gold. Flower of enormous size, held on erect stem.	.40
ROYAL FLUSH—Bright flame scarlet, enormous well formed flowers, good long stems, free flowering.	.50
ROYAL WHITE—Pure white, large blooms on long strong stems.	.75
SINGAPORE—Color fiery poppy-red. Fine flowers on long, strong stems.	.40
THE WORLD—Rich deep rosy magenta overlaid violet with silver shadings on edges of petals. Free bloomer.	.35

DAHLIAS—SHOW

MAUDE ADAMS—Very free flowering, white with lavender blush. A very beautiful Dahlia and one that should be in every collection.	.20
---	-----

DAHLIAS—POMPON

ACE OF DIAMONDS—Dark red	} Each	.20
BELLE OF SPRINGFIELD—Good dark red		
CHEERFULNESS—Light pink		
EDITH MULLER—Red and yellow		

MINATURES

BABY ROYAL—A dwarf cactus, colored yellowish salmon pink. Free flowering.	.25
HONEYBIRD—Min. Cactus. Yellow at centre to bright orange. Full centre, free flowering, excellent for cutting.	.40
TEDDY BEAR—Rosette. A tiny flower, very pretty, color blood-red. Long wiry stem. Good for cutting.	.40

MIXED DAHLIAS

A good mixture made up of all named varieties, each	.15
SPECIAL—Mixed Dahlias, all different, made up of named varieties, not necessarily from above list; each one named, 6 for	1.00

BARGAIN COLLECTIONS

10 Dahlias not named, every one different color, and all good varieties, no junk. Price, 10 for	1.50
---	------

GLADIOLI

AFLAME—Extra large blooms of begonia rose. Unusually graceful and attractive.05	.04
ALBATROS—A splendid, large flowered pure white. Tall spike with several blooms open.06	.04
APRICOT GLOW—Clear, warm apricot. Tall, strong spike and large flowers05	.04
BERTY. SNOW—Magnificent large lavender. In great demand.05	.04
BREAK O' DAY—Beautiful soft La France pink on cream ground. Very early.05	.04
BUTTERBOY—An extra tall, strong plant and giant bulb. Large buttercup yellow flowers, nicely spaced on spike. A decidedly distinct and showy Primulinus variety of much merit.04	.03
CORONADO—Large spike of clear pink. good bloom06	.04
CRIMSON GLOW—Best Crimson.04
ELECTRA—Large bloom of orange scarlet with white blotch in throat. Tall spike.04
FLORENCE BARCKLEY—Large deep pink with good spike. Early flowering.05	.04
GLADDIE BOY—Tall spikes of rose pink on cream ground. Early blooming.04	.03
GLORIANO—Tall spike of clear salmon, large blooms.06	.04
GOLD EAGLE—Deep pure yellow. Straight slender spike. Very early.04	.03
NANCY HANKS—Rich apricot shading to orange.05	.04
PICARDY—Color, soft apricot pink with a silvery sheen, feathering of slightly deeper color in the throat. The individual florets are extremely large, slightly ruffled and of a heavy waxlike substance. There are 6 to 10 of these magnificent blooms open at one time. which are well placed on a graceful spike.05	.04
RADIANT ORANGE—Clear, apricot orange. Large, wide open flowers.05	.04
SCHWABEN GIRL—Pure pink, strong straight spikes, large florets with round petals, 8 to 10 inches open. Surprisingly early for such a large Glad.06	.05
THOS. A. EDISON—A rich golden bronze, striped throat.05	.04

MIXED GLADIOLI

A fine mixture of all colors, early flowering, and large blooms. This mixture is made up of named varieties and the bulbs were all grown at our Nursery at South Edmonton. Per dozen39
Per 100	2.25

PEONIES

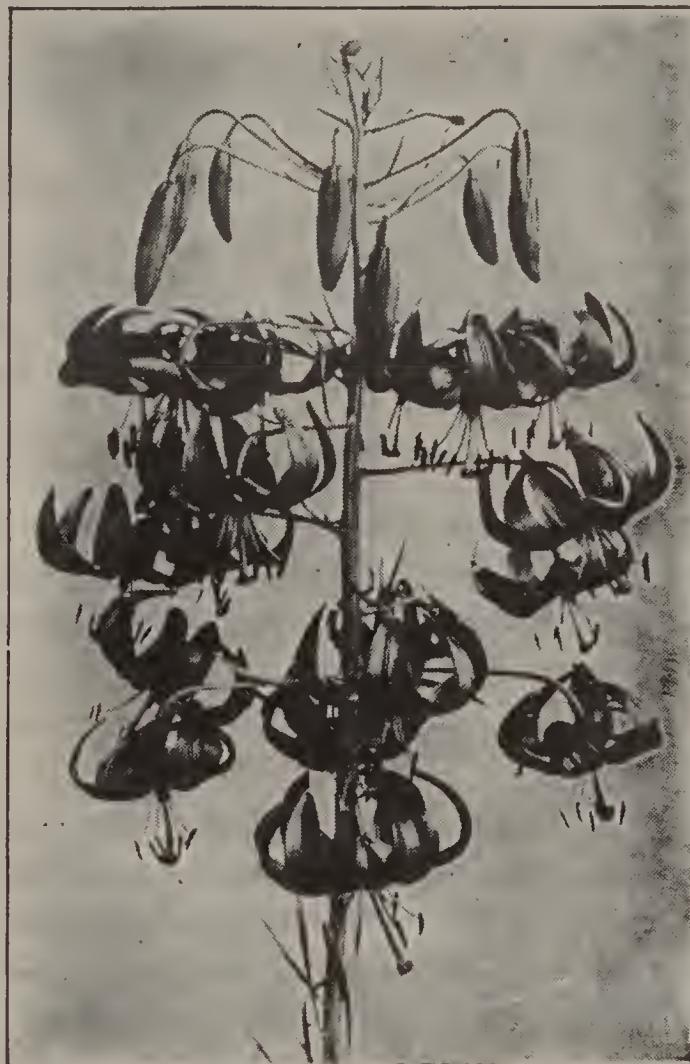

Of all hardy flowers for Canada, Peonies stand first. They will live for years if totally neglected, but will repay the grower for a little attention. The figures preceding the name of variety denotes the value rating according to the American Peony Society, 10.0 represents perfection in both blossom and plant.

8.6	ALBERT CROUSSE—A very large, flat and compact bomb. Fresh salmon-pink, with very delicate shading of rose-white. Late. Fragrant, free bloomer, and one of the finest pink sorts.	.50
8.1	DUCHESSE DE NEMOURS—Creamy-white. Early, medium height, free bloomer. An outstanding Peony at a low price. Each	.50
7.6	EDULIS SUPERBA—Early. Bright, clear mauve-pink with silvery reflex. Exceedingly fragrant, free bloomer.	.50
8.4	FELIX CROUSSE—One of the best reds. Bomb type. Late mid-season. A self-colored, full rich, brilliant red. Very fragrant and a free bloomer.	.50
9.3	FESTIVA MAXIMA—Snowy-white, prominently flecked crimson. Tall, vigorous grower, early, and excellent for cut flower.	.50
8.8	KARL ROSENFIELD—Semi-rose type (Midseason). Flowers, large globular, compact. Very brilliant, rich velvety crimson.	.75
9.8	KELWAY'S GLORIOUS—White. One of the finest Peonies in existence. Enormous full double blooms of cream-white. Very fragrant. Mid-season. (Fall, 1939)	3.50
9.1	LADY ALEXANDER DUFF—Rose type. Immense flowers of fine form. Sweetly scented. Color, delicate pale pink or blush, fading to white. (Midseason)	.75
9.9	LE CYGNE—Pure milk-white flower of immense size, in-curving petals, generally considered the finest white peony.	2.50
8.1	LIVINGSTONE—Very large, compact. Perfect rose type. Pale lilac-rose with silver tips. Central petals flaked carmine. Very strong, free bloomer.	.50

9.0	LONGFELLOW—Red. Of clear bright crimson, without objectionable violet hue so often seen in red varieties. Semi-rose type. Midseason.	1.50
8.1	MADAME CALOT—Pinkish white, tinted with flesh color, large bloom. Early.	.50
	MADAME EMILE DEBATENE (New, no rating yet)—Very large and fine rose-shaped flower, quite full, beautiful vivid China-pink with silvery reflex. (Fall, 1939)	1.50
9.4	MADAME JULES DESSERT—Very large, lilac-white with straw-colored shading flecked carmine waved petals, spangled with golden stamens. A superb variety.	.75
8.5	MARIE LEMOINE—Compact rose type. Very late. Flowers enormous. Pure white with cream-white centre. Occasional carmine tip. Fragrant.	.50
9.1	MARTHA BULLOCK—Pink. A giant in size, sometimes measuring 10 to 11 inches in diameter. Deep rose pink in centre, shading to silvery pink in the outer petals. Fragrance very sweet (Available Fall, 1939)	3.50
9.2	MONS. JULES ELIE—Bomb type. Early midseason. Considered by many the best of all peonies. Immense, globular, very full flowers of pale lilac-rose; collar lighter, shaded amber-yellow at base. Very fragrant.	.50
9.2	PHILIPPE RIVOIRE—Perfect flower with deeply serrate petals of a very dark amaranth-purple. The finest red Peony which exists. Has a lovely tea-rose fragrance. Late. (Available Fall, 1939)	3.50
8.6	PRIMEVERE (Mid-season) Yellow. The nearest approach to a yellow in the Chinese section. Guards creamy-white, splashed scarlet. Centre, light sulphur yellow. Bomb type.	.50
9.0	RAOUL DESSERT—Very large flower, mauve with carmine-rose, shading silvery-white. Late mid-season. (Available Fall, 1939)	1.50
8.8	RICHARD CARVEL—Large bomb of Felix Crousse style, but of better color. Probably one of the best early red. (Available Fall, 1939)	1.00
9.0	ROSA BONHEUR—Very large flat flower, rose type, fresh soft fleshy pink. Free bloomer, mid-season. (Available, Fall, 1939)	2.00
9.0	SARAH BERNHARDT—Flat, compact, semi-rose type. Mauve-rose tipped silver. Fragrant. Tall free bloomer.	.75
9.1	SOUVENIR DE LOUIS BIGOT—Large flowers of bengal rose, turning to salmon-pink silver reflex. Very fine. Late. (Available Fall, 1939)	1.50
9.7	SOLANGE—Undoubtedly one of the three loveliest and most perfect Peonies in existence. Color deep creamy white, shaded orange salmon at heart and suffused Havana brown.	1.50
9.4	TOURANGELLE—Cup-shaped flower, delicate flesh with deeper salmon shadings. Most unusual and beautiful fresh coloring. A splendid variety.	.75

8.2 ROSEA SUPERBA—Beautiful, large soft pink, very early. (Available Fall, 1939)75
8.6 RUBRA PLENA—Bright dark red, double bomb-shaped flowers. Very early. (Available Fall, 1939)75
TENUIFOLIA FLORE PLENO—This variety is very early, blooms in early June and has very pretty fringed foliage, does not grow more than two feet high. This type should not be con- fused with the CHINENSIS as it is quite distinct from it. The color is a good red and flowers are double.	1.00

Lilium Tenuifolium.

LILIES

CONCOLOR—Dropmore variety. Star-shaped flowers of deep crimson, with dark spots, each40
TENUIFOLIUM (Coral Lily)—Flowers of glossy scarlet with recurved petals. From 10 to 20 blooms on a stem. Height, 12 to 18 inches. Plant 5 inches deep. July25

Grandis—Long spikes of blue bells.20
Persicifolia Moerheimii—Beautiful spikes of large double white flowers, remaining in bloom over a long period, July-August. 2 feet.25
Persicifolia, Telham Beauty—Spikes of large blue flowers.25

CHRYSANTHEMUM —Hardy garden daisies, white, good for cutting.		
Elder Daisy—Very hardy and floriferous. June and Sept. 18 to 24 inches.	.20	
Leucanthemum Maximum (Italian Daisy)—Large flowered and hardy. July-August.	.20	
DELPHINIUM Hybrids—Blackmore and Langdon strain.	.20	
DIANTHUS Barbatus (Sweet William)—Mixed colors.	.15	
Plumarius—Clove pink, mixed.	.15	
Plumarius—Good double pink, divisions of selected plant.	.25	
Mrs. Sinkins—Double white, large flowers.	.25	
DIELYTRA —The old favorite Bleeding Heart. Grows well anywhere. June. 2 feet.	.50	
DORONICUM — Plantagineum Excelsum —Lovely yellow daisies on long stems in May and June.	.25	
ERYNGIUM (Sea Holly)—Handsome blue-tinged foliage, blue flowers. August. 3 feet.	.20	
GAILLARDIA , Dazzler—Large flowers, good for cutting, yellow with red centre.	.20	
Burgundy—New dark red.	.25	
GYPSOPHILA (Baby's Breath)—Myriads of small white flowers.	.20	
Snow White—Double-flowered, selected seedlings.	.35	
HEMEROCALLIS , Dr. Regel's—Yellow lily-like bloom, free flowering, 24 inch.	.20	
Flava Major—Yellow flowers.	.20	
IRIS —See special list on page 9.		
LAVATERA Thuringiaca—A showy, bushy plant, with bright pink mallow blooms. July-September. 5 feet.	.20	
LINUM Perenne—Blue perennial flax, fresh blooms every morning.	.15	
LUPINUS Russell Hybrids—Effective plants with large spikes of purple, blue or rose flowers. Not fully hardy, but worth growing.	.25	
LYCHNIS Arkwrightii—Heads of large scarlet or orange blooms. 12 inches.	.20	
Chalcedonica—Very hardy and showy, scarlet heads. 2 to 3 ft.	.15	
Chalcedonica flore pleno—New double form, very effective.	.25	
LYTHRUM Rose Queen—Stiff spikes crowded with rosy blooms. August. 2 feet.	.20	
PAPAVER Nudicaule (Iceland Poppy)—Sunbeam strain. Good mixture, biennial.	.15	
Orientale Olympia—Double orange-scarlet, free bloomer.	.20	
Oriental Hybrids in mixed colors.	.20	
PENTSTEMON Secundiflorus—Tall spikes of rosy-lilac flowers. 2 feet.	.25	
PHLOX HARDY Prairie varieties—Ada Blackjack, pink; Boughen, lavender pink; Pyramid, white.	.25	
PULMONARIA Mrs. Moon—Early blooming plants with silvery spotted foliage.	.20	

PYRETHRUM Hybrids—Painted daisies, pink, red or white.

June. 2 feet.	.20
Alfred Kelway —Double dark red variety.	.40
Aphrodite —Double white.	.40
Progression —Double dark rose, very strong growing.	.40
Queen Mary —Double pink.	.40

SCABIOSA Caucasica—Beautiful blue flowers, good for cutting.

July-August. 18 inches.	.20
-------------------------	-----

Trollius Europaeus.

TROLLIUS Hybrids—Beautiful yellow buttercup-like flowers.

Like half-shade and moisture. May-June. 18 to 24 inches.	.20
Empire Day —Deep Yellow.	.40
Excelsior —Orange-red	.40
Glory of Leiden —Large orange	.40
Miss Mary Russell —Light yellow	.40

VERONICA Spicata—Very hardy plants with spikes of small blue flowers. July-Sept.

.15

Spicata Rubra —New, deep pink flowers.	.25
---	-----

Teucrium —Dwarf spreading plants, with a mass of bright blue flowers.	.20

ROCK PLANTS

ALLIUM <i>Kansuense</i> —A dwarf allium, forming a clump of grassy foliage with drooping heads of purple flowers.25
ALYSSUM <i>Argenteum</i> —A strong growing plant with silver foliage and clustered heads of yellow flowers all summer.20
<i>Saxatile</i> —Broad masses of golden flowers in early spring.20
ANEMONE <i>Pulsatilla</i> —European form of our prairie anemone. Violet. 1 foot. May20
AQUILEGIA <i>Jucunda</i> —Broad blue sepals with clear white petals. Likes rich, well-drained soil. Choice25
<i>Pyrenaica</i> —A gem in bright blue with long leaves. It likes limey soil. 8 to 10 inches.25
ASTER <i>Alpinus</i> —Neat dwarf plants with large purple semi-double blooms.20
CAMPANULA —	
<i>Turbinata Compacta</i> —Very dwarf plant covered with lovely deep-blue flowers. Very choice, easily grown and does not seed itself.25
<i>Garganica</i> —A low-spreading clump, with starry bluebells....	.25
<i>Pusilla</i> —A mat-forming bluebell, blue, free bloomer with shiny leaves.20
CERASTIUM <i>Alpinum</i> —A grey-leaved trailer, with white flowers.20
DIANTHUS —	
<i>Caesius</i> —A dwarf single clove-pink, mat forming, 4-6 inches.20
<i>Duchess of Fife</i> —Single pink flowers on dwarf compact plants. One of the best of the plumarius type. True stock.25
DODECATHEON <i>Arrowsmith</i> —A dwarf shooting star easily grown in moist peaty soil.25

GENTIANA Cruciatæ —An easy variety, clusters of blue flowers.	
Likes lime. 12-15 inches. August25
Farreri —Grass-like foliage, sky-blue trumpets from late August till frost. Choice. Year-old divisions.25
Purdomi —Trailing form with deep blue flowers.25
LINARIA Alpina —A pretty trailer with snapdragon blossoms of purple.15
LINUM Alpinum —A prostrate form of the blue flax. 4 inches.20
Flavum Compactum —Dwarf habit, large yellow flowers in heads. 8 to 10 inches. July20
LOTUS Corniculatus —Yellow pea-shaped flowers in lax sprays, blooms all summer.20
NEPETA Mussini —Spreading clumps of grey leaves and lavender-blue flowers.20
PENTSTEMON —	
Humilis —A splendid alpine with mats of shiny leaves and crowded spikes of blue flowers. June. 10 inches.20
PHACELIA Sericea —A native Alpine, with greyish leaves and blue flowers.25
PHLOX —	
Reptans —Evergreen creeper with large rose-pink flowers. Shade or moisture.20
Subulata (Moss phlox) —Early flowering creeper with prickly evergreen foliage and starry blossoms. Alba, Lilacina and Rosea.20
Subulata Sprite —Large flowers of bright pink.25
Subulata Appleblossom —A new delicate pink.25
Collection of Phlox —3 different, our choice.50
POLEMONIUM Confertum —A Western American Alpine, with lovely bright blue flowers.20
POTENTILLA —	
Reptans Fl. Pl. —A creeper with small double yellow flowers, good beside pool.20

PRIMULA Auricula —Rosettes of thick leaves with umbels of velvety flowers. Prefers half shade, and a well-drained soil with lime. June. 8 inches.....	.25
Farinosa —A dainty pale purple form for moist places. 6 ins.	.25
Florindae —A tall yellow Primrose from China, for moist cool situation.25
Longiflora —A choice primula with umbels of lilac-rose, on 4-inch stems. It belongs to the farinosa section, but has large flowers.35
Luteola —Of robust growth, heads of yellow cowslip blooms, very dependable bloomer in moist soil and sunshine. June. 12 to 15 inches.25
Veris —The old fashioned garden Primrose in yellowish brown.	.25
SAXIFRAGA Aizoon —Small encrusted rosettes form into attractive mats with white flowers. Requires limey, well-drained soil in partial shade25
Apiculata —Spiny green rosettes and yellow flowers. Early flowering, and easy to grow.25
Cordifolia —Rosettes of large shiny leaves, and spikes of rose flowers. Part shade. Early bloomer20
Englerri —A good encrusted sax, forming large rosettes of long narrow leaves.25
Macnabiana —An easily grown encrusted sax, large rosettes with long spikes of white flowers.25
SEDUM Acre —A mossy Stonecrop with yellow flowers.15
Album Balticum —Lovely green beads on frail stems, with a profusion of white flowers. Very hardy.20
Ellacombianum —Resembles Kamtschaticum, but is dwarfer, and lighter green, not trailing.15
Ewersii —Dense clusters of bluish leaves, pink flowers. July. 4 to 6 inches.20
Kamtschaticum —Glossy evergreen leaves on trailing stems. Orange flowers.15
Kamtsch. Variegata —Very attractive form with white-edged leaves, brownish-red buds and orange flowers.20
Leibergii —One of the hardiest, blue-green foliage, yellow flowers.20
Lydium —A close mossy mat of bright green foliage and small white flowers.20
Obtusatum —Fat green leaves, turning red and bronze, yellow flowers. Good.20
Sexangulare —Bronze green mat with fellow flowers.15
Spurium —A trailer with flat leaves, and pink or white flowers.	.15
Spurium Atropurpureum —Deep reddish flowers and leaves.	.20
Collection of Sedums —4 different, our choice.50
9 different, our choice.	1.00
SEMPERVIVUM —	
Fimbriatum —Rosettes of brownish green slightly hairy.15
Globiferum —Globular green rosettes, with tiny offsets which drop off when touched.15
Tectorum —Large rosettes, green, tipped brown.15

THYMUS Serpyllum—Creeping thyme, for open sunny positions.

Fragrant evergreen foliage, covered in July with tiny lilac blossoms.

.15

Serpyllum Album—Bright green leaves, white flowers.

.15

Serpyllum Coccineum—Crimson flowering form.

.20

Serpyllum Lanuginosum—Woolly leaved thyme.

.15

Collection of Thymes, 4 different.

.50

VERONICA—

Incana—Clumps of silvery foliage, spikes of violet flowers.

.20

Pectinata Rosea—A gray-leaved trailer with pink flowers.

.20

Prostrata—A creeping variety, forming a green carpet, blue flowers.

.25

Prostrata Rosea—A pink form of above.

.25

Teucrium—Blue, dwarf bushy habit, profuse bloomer. June-July. 9 to 12 inches

.20

Collection of Veronicas, 3 different, our choice.

.50

VIOLA—

Missouriensis—Fragrant violet, small mauve flowers.

.25

All Alpines marked at: **15c**, 2 for **25c**. 1.35 per doz.

20c, 2 for **35c**. 2.00 per doz.
